

For better job opportunities in Japan, TTC is the right choice!

Many international students have acquired skills and knowledge at TTC (Tokyo Technical College, a vocational school), and are now working in Japan. Develop the skills you need for your career and become an engineer/creator in your desired industry.

employment rate

100%

※Based on 2024 data

Total number of international graduates is approximately

1,400

※Cumulative total as of March 2024

Essential skills for working in Japan /

Skills and certifications relevant to work in specialized fields

Japanese language proficiency (N2 level or above)

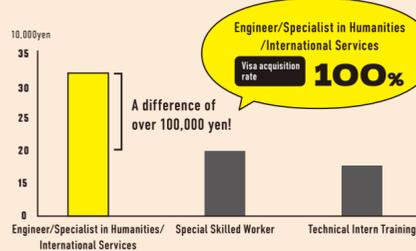

Business etiquette

Expand your career options and future opportunities by acquiring specialized skills and knowledge.

Get a job at a Japanese company with an "Engineer / Specialist in Humanities / International Services" status of residence!

International students who graduated from our school have achieved a 100% acquisition rate of the "Engineer/Specialist in Humanities/International Services" status of residence (as of the academic year 2024)! The average monthly salary for those holding the "Engineer/Specialist in Humanities/International Services" residence status is over 300,000 yen! Compared to "Specified Skilled Worker" or "Technical Intern Training" work visas, where salaries are below 200,000 yen per month, you can earn over 100,000 yen more.

※Based on a survey in 2021 by the Ministry of Health, Labour and Welfare

Alumni interview

Phyu Sin Moe

From Myanmar
Graduated in March 2022

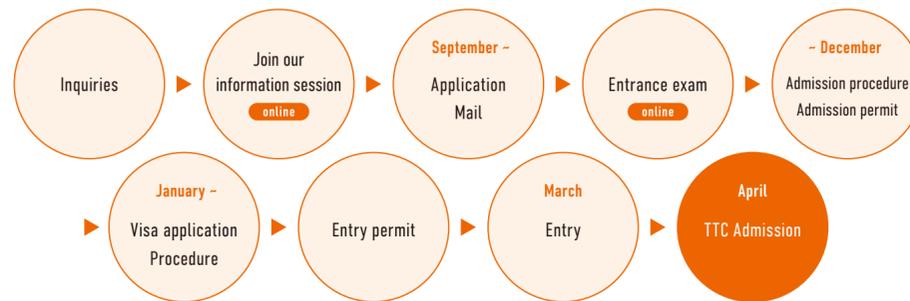

Employed at
W2 Corporation

The classes in the Information Processing Department were difficult but interesting. I had to study hard because I couldn't keep up otherwise. I worked part-time for 20 hours a week, but sometimes I stayed up late to study after that. However the teachers explained things thoroughly until I understood them, and they spoke Japanese clearly for better understanding. It was fun and interesting. The teachers often said "for example" when explaining things. Being given examples made it much easier to understand. I enjoy listening to others, I was able to make good friends who also supported me. Thanks to them, I was able to get a job at a large company that develops shopping websites. My job is rewarding and I am doing my best!

(Interviewed in January 2022)

Flow of admission

ACCESS

4 min by train from **Shinjuku Station**
In front of Higashi-Nakano Station

4-2-3 Higashi-Nakano,
Nakano-ku, Tokyo 164-8787
TEL : 03-3360-8881
FAX : 03-3360-8820

Even if you live a long way away, or even overseas, we'd be happy to discuss it!

● Admissions consultation on LINE app!

You can stay informed and connected through the school's social media and information.

● Online school information sessions

If you're too far away to attend an open campus event, or if you just want to ask about the courses, feel free to join in via your smartphone or PC!

Let's become an engineer or creator!

TTC TOKYO TECHNICAL COLLEGE

GO! YOUR FUTURE

TTC has support system in place for international students, so you can feel reassured!

1. Koyama Educational Method For those who feel anxious about keeping up with their studies!

We have introduced a system that allows students to take classes with confidence, even if they struggle with studying or Japanese language. Easy-to-follow classes and teacher support make learning fun!

- 01 A quarter system that enables students to review and check in a short period of time
- 02 A syllabus and a detailed class syllabus designed for in-depth learning
- 03 Class sheets that help students focus during class
- 04 Class records to check and reinforce students' understanding of what they have learned
- 05 Supplementary lessons to clear up any questions from class

Check out the video for details

Classes are held only on weekdays. No classes on Saturdays or Sundays, so students have time for reviewing lessons or working part-time.

Class schedule *Classes are held 5 days a week (Monday to Friday)	1st period 9:20 - 10:50	2nd period 11:00 - 12:30	3rd period 13:30 - 15:00	4th period 15:10 - 16:40
--	----------------------------	-----------------------------	-----------------------------	-----------------------------

2. Department of Bridge Engineering (1-year program) For those who want to learn Japanese to be more confident!

Find the field you want to pursue while studying Japanese, in order to play an active role in the global environment in the future! Throughout the 1-year program, you will learn the language and the basics of each field, aiming to become an engineer capable of facilitating manufacturing.

What you learn in the program

N2 level Japanese language education

Fundamental knowledge in engineering fields
Automobile • Architecture
IT • Biotechnology

Development skills • Information Technology
IT • Business

3. Scholarships

Scholarships, tuition exemptions, support, and referral systems for international students

1. Benefits for international students recommended by specified schools

This is a system for reducing or exempting tuition fees for applicants recommended by specified schools who have excellent grades and attendance.

2. Scholarships for international students

This is a system reducing or exempting the cost of tuition fees for applicants who have excellent grades and attendance.

3. Koyama Gakuen Supporters' Association Scholarships

The Koyama Gakuen Supporters' Association, which consists of 116 outstanding companies, offers grant-type scholarships.

4. (for international students) Koyama Gakuen Supporters' Association Scholarships for Higher Education

These scholarships are offered by the Koyama Gakuen Supporters' Association to students who wish to pursue a higher level of specialized education.

5. Koyama Gakuen Honor Students Program

This is an independent system by Koyama Gakuen that provides partial exemption from tuition fees for currently enrolled students.

6. Student Dormitory Support Program

To help alleviate the financial burden on prospective students, partial support is provided for the cost of living in designated Koyama Gakuen student dormitories.

7. Referral Systems

There is a referral system for current students and graduates, a referral system for faculty and staff, and a referral system for supporting companies, and a Harley-Davidson referral system.

There are many other scholarships available for international students.

Japan Student Services Organization (JASSO) — Support Programs for International Students (Formerly known as the MEXT Honors Scholarship Program for Privately-Financed International Students)

- MEXT Honors Scholarship Program for Privately-Financed International Students (newly enrolled & prospective students)
- MEXT Honors Scholarship Program for Privately-Financed International Students (currently enrolled students and those recommended by school)

Study and living support for international students

Orientation for international students

In April, prior to the start of classes, an orientation is held for international students, where we explain in detail how we support international students at our school in their studies and in daily living.

International Student Consultation Service

Staff responsible for international students are available to help with any problems that international students may experience in their studies or in daily living.

Employment counseling

We provide specialized job-seeking guidance to international students who wish to find a job in Japan, supporting their efforts to find a job at outstanding companies.

Accident insurance

We provide accident insurance for students against accidents or injuries that may occur during classes, practical training, school events, extracurricular activities, or in daily life while students are enrolled in our school.

Accommodation referrals

We will introduce you to student dormitories and real estate agencies affiliated with our school.

Future IT engineers! Acquire the skills to make use of your unique sense and individuality!

IT & GAME & WEB

Career Goal | System engineer | Programmer | IoT engineer | Data scientist | Game programmer | Web designer

Department of Data Processing 2-year program

Master the entire development techniques, from planning and design to programming! Become an IT engineer at the forefront of the industry.

Certifications	Fundamental Information Technology Engineer / Applied Information Technology Engineer / Oracle Certified Java Programmer, Silver SE11 / ORACLE MASTER Silver SQL 2019, etc.
Career Opportunities	teamLab Inc. / GMO Commerce, Inc. / W2 Co., Ltd. / Canon IT Solutions Inc., etc.

Recommended classes

Java Programming

With over 700 hours of in-depth Java programming study in 2 years, you will also gain a solid understanding of other programming languages. Enjoy learning with our original, easy-to-understand materials!

Department of IoT + AI 2-year program

Become an engineer who brings your ideas to life with the power of IoT. Hone your technical skills and creativity to drive innovation in the world!

Certifications	Python 3 Engineer Certification Basic Exam / Statistics Certification Grade 3 / Fundamental Information Technology engineer / IoT System Technology Certification Basic, etc.
Career Opportunities	INFOCOM CORPORATION / MIRAIT ONE Corporation / NXTech Co., Ltd., etc.

Recommended classes

Device Practicum

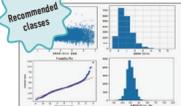

By using IoT devices such as Raspberry Pi and Arduino, you will learn how to obtain data such as temperature and distance from sensors. You will also acquire knowledge of electronic circuits.

Department of Data Science + AI 2-year program

Acquire data analysis skills, programming skills, and business skills! Become a data scientist who can solve problems across various fields.

Certifications	Japan Statistical Society Certificate / Fundamental Information Technology engineer / The Official Business Skill Test in Book-keeping Grade 3 / Data Scientist Certification, etc.
Career Opportunities	Techsor Inc. / ToYWork Corporation, etc.

Recommended classes

Python Statistics

Students will master "Python" as a core programming language in their coursework. Python is widely used not only for data analysis but also for web service development and automating repetitive tasks.

Department of Game + Digital Creator 2-year program

Students will learn programming so that they can create their own games using their creativity and technical skills.

Certifications	Fundamental Information Technology engineer / Information Certification Test (J-ken) / Microsoft Office Specialist / C Language Programming Proficiency Test Grades 2 and 3, etc.
Career Opportunities	GungHo Online Entertainment, Inc. / SEGA CORPORATION / BANDAI NAMCO Entertainment Inc. / SYSTEM YOU / Soft Hyperion Corporation, etc.

Recommended classes

Game development skills

By studying existing games and films, students will learn how to craft game narratives and develop complete games. Students not only program games but also design their own characters.

Department of Web Visual Creator

Students will learn web design, video production, and programming. Become a creator capable of creating diverse works after acquiring a broad range of essential skills in this course.

Certifications	Web Designer Certification Test / Web Creator Skills Qualification Test / Color Proficiency Test Level 2 and 3, etc.
Career Opportunities	CyberAgent, Inc. / Arcamix Institute for general Research / Brandex co., Ltd. / MEGA Co., Ltd., etc.

Recommended classes

Video shooting • Video editing

Through hands-on practice, students will acquire essential skills for video production process, such as scripting, camera work, and editing.

"Many international senior students are studying here!"

Watch messages from our current students and explore their student life!"

Looking to build a career in the architecture and construction industry? Master cutting-edge digital technology and thrive in the field!

ARCHITECTURE & INTERIOR

Career Goal | Site foreman | Architect | Interior coordinator

Department of Architectural Director 4-year program

Gain expertise in construction design over 4 years and become a lead construction site manager. Pursue a career at one of Japan's top construction firms!

Certifications	First Class Architect* / Second Class Architect / Second Class Building operation and Management Engineer, etc. *Registration as a first-class architect requires 2 years of work experience.
Career Opportunities	SHIMIZU CORPORATION / DAIWA HOUSE INDUSTRY CO., LTD. / Kumagai Gumi Co., Ltd. / Fujita Corporation / HAZAMA ANDO CORPORATION / TOA CORPORATION, etc.

BIM

BIM is a technology that integrates information across all phases, from design and construction to maintenance and management, by generating a 3D building model on a computer and enhancing it with data such as cost, finishes, management details.

Recommended classes

Department of Architecture 2-year program

Within 6 months after enrollment, you will reach the skill level required for the second-class architect practical exam. In 2 years, you will acquire the skills to excel in your career from day one!

Certifications	First Class Architect* / Second Class Architect / Second Class Building operation and management engineer (working experience required), etc. *Registration as a first-class architect requires 4 years of work experience.
Career Opportunities	SHIMIZU CORPORATION / SEIWA CORPORATION CO., LTD. / DAIWA HOUSE INDUSTRY CO., LTD., etc.

Practical design & Design from day one

Students will learn how to complete a client's request in a short period of time, keeping real-world applications in mind even in assignments. Students practice designing effective proposals for clients, considering factors such as land conditions and regulations.

Recommended classes

Department of Interior Design 2-year program

Students will acquire knowledge of both interior design and architecture! Become a specialist in creating comprehensive design solutions for living spaces.

Certifications	Interior Coordinator / Second Class Architect / Interior Planner / Color Proficiency Test, etc.
Career Opportunities	Sekisui House, Ltd. / Tama Home Co., Ltd. / Sumitomo Realty & Development Co., Ltd., etc.

Digital skills

In the first year, students acquire digital skills in CAD for drafting and Shade for 3DCG rendering, as well as graphic design skills using Photoshop and Illustrator. In the second year, students apply the skills to designing living spaces.

Recommended classes

For future environmental engineers and biological experiment specialists! Become a highly sought-after professional worldwide!

ENVIRONMENT & BIOTECHNOLOGY

Career Goal | Environmental engineer | Biotechnologist

Department of Environmental Technology 2-year program

Gain expertise in both chemical analysis and treatment technologies to help protect the environment! Become an engineer with a global perspective to contribute to environmental conservation!

Certifications	Pollution Control Manager/Handlers of Poisonous and Deleterious Substances/ Environmental Regenerator/Taxonomic Proficiency Test, etc.
Career Opportunities	Swing Corporation / Nishihara Environment / Ebara Qingdao Co., Ltd. / Yeolia Jenets Co., Ltd., etc.

Recommended classes

Physicochemical water treatment practical training

The demand for water quality analysis is increasing worldwide, as it is essential for environmental protection. In addition to water quality analysis and investigation techniques, students will also learn "purification technologies".

Department of Biotechnology 2-year program

Learn the fundamentals of biotechnology in the classroom and develop hands-on experimental skills in the laboratory. Become an engineer ready to contribute from day one of your career!

Certifications	Intermediate Biotechnology Engineer Certification / Advanced Biotechnology Engineer Certification / Handlers of Poisonous and Deleterious Substances/ Hazardous Materials Engineer Class B Group 4, etc.
Career Opportunities	TEIJIN PHARMA LIMITED. / MORINAGA MILK INDUSTRY CO., LTD. / Chateraise Co., Ltd. / FUJIFILM Wako Chemical Corporation / AGC Inc. / JT Creative Service Co., Ltd., etc.

Recommended classes

Applied Microbiology Laboratory

Ensuring food safety requires identifying bacteria and other microorganisms present in food. Students learn testing methods and laboratory techniques to conduct food safety analysis.
